

DIGITAL INTERCOM MADE AFFORDABLE

PunQtum intercom enables easy communication between your event crew. Just connect to any PoE network and you have a working party line intercom. With up to 32 channels it can handle any type of event.

Q210 four channel speaker station

Take full control with programmable buttons, audio in for show relay and audio out to PA systems. It even has a built-in PoE+ switch to power up to 8 beltpacks to be a completely self-contained communication hub.

Q110 two-channel beltpack

Easy to use with standard talk, call and volume controls. You can even daisy-chain beltpacks together - no need to run individual cables back to the switch.

No limits

With punQtum you can have as many beltpacks as you want. Even run multiple intercomsystems on the same network and quickly repurpose beltpacks as required. With up to 32 channels, a punQtum system can handle any type of event.

Advanced features

As well as being very easy to use, punQtum is packed with advanced features; replay missed messages, make PA announcements directly from a beltpack, and even trigger logic outputs.

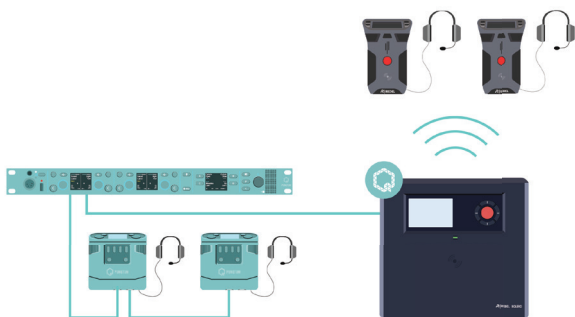

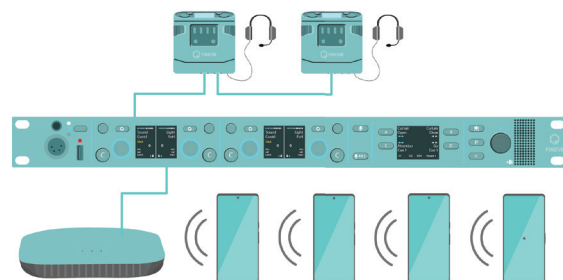

**EXTEND YOUR
COMMUNICATION**

PunQtum Wireless - Connect to mobile devices

Simply download the punQtum Wireless app and your mobile device works just like any punQtum beltpack. Connect up to four mobile devices to each speaker station in your network.

(NEEDS PUNQTUM Q210 PW SPEAKER STATION)

Bolero Connect

Just connect your punQtum intercom network to a Bolero antenna and enjoy the seamless integration of punQtum and Riedel's award-winning Bolero wireless intercom. All channel names are passed between the two systems.
